Company description

Fiskars Group manages several design-driven brands for both indoor and outdoor living. The most well-known brands are Fiskars, Georg Jensen, and Royal Copenhagen. About a third of sales come from luxury products, and together with other premium products, tableware and interior decor make up over half of sales. The other half comes from gardening tools, scissors, and cooking. During the past few years, the company has significantly simplified its organisational structure and has heavily streamlined its cost base. Fiskars Group focuses on increasing the share of direct-toconsumer and its key markets, the US and China.

Fiskars

A reset of expectations due to indirect impact from US tariffs Q2 25 results due 17 July

Fiskars has lowered its FY25 guidance after a more rapid and negative indirect impact from US import tariffs than it had previously expected. This has led us to reset our expectations and cut our estimates significantly for 2025-27E, especially in BA Fiskars (with 50% of sales from the US). We lower our fair value range to EUR14.5-17.5 (from EUR16-19).

- Indirect tariff impact hits now and the direct impact to come later. According to the company, the indirect impacts from US import tariffs on retailer demand and the retailers' inventory control have affected sales in the country more rapidly and negatively than previously anticipated. The US represents some 30% of sales (50% of BA Fiskars) and a majority of production is sourced from Asia. We believe that Fiskars has been focusing more on long-term market shares at retailers rather than short-term gains and has thus not wanted to (or been able to) raise prices in line with the tariffs. This has impacted profitability, especially in Q2 by our estimates, but will likely impact H2 as well. However, Fiskars might be able to get through some price adjustments with a lag, which could potentially support H2 to some extent. Further, we believe Fiskars can cut its marketing spend as needed in H2 if demand remains modest. The tariff impact on 2025 is mostly indirect as most of the goods sold in BA Fiskars in H1 had been customs cleared ahead of the tariff hikes. This makes it likely, in our view, that the direct impact will be felt in 2026 and here the pricing and negotiations with customers during H2 will be key for next year's performance.
- Unexpected change of CEO. Fiskars announced in early May that the group's CEO was stepping down from her role, with the vice chair of the board, Jyri Luomakoski, taking over as interim CEO. While this move was unexpected, we do not believe it was related to Fiskars' performance in the US in Q2. Nonetheless, we find that the uncertainty around the investment case is currently elevated.
- Estimate changes. We lower our net sales estimates around 4% and adj. EBIT estimates 11.5-18.9% for 2025-27E.
- Valuation. We lower our fair value range to EUR14.5-17.5 (from EUR16-19), which corresponds to EV/EBIT of 13.1-15.0x on our 2026E estimates.

Expectations for Q2 25 and rest of the year

According to the profit warning ahead of the Q2 results, Fiskars has faced a rapid decline in demand from retailers in the US. This drop in demand is due to the indirect impacts from US tariffs and became visible in May and June. We believe the drop in demand has put pressure on margins. We think this has likely been further exacerbated by Fiskars focusing more on long-term market shares at retailers than short-term gains, as we believe the company has not wanted to (or been able to) raise prices in line with the tariffs. This has impacted profitability, especially in Q2 on our estimates, but will likely impact H2 as well.

We believe that Fiskars might be able to get through some price adjustments with a lag, which could potentially support H2 to some extent. Our understanding is that price changes in contracts with retailers come with a lag (up to one quarter, we estimate). H2 could potentially also be supported by Fiskars reducing its market spend as need if demand remains modest. Therefore, we expect most of the negatives from the profit warning to relate to Q2 (and the Fiskars BA) while H2 could be somewhat better. As BA Vita is more tilted towards H2, especially Q4, and the current challenges seem to mostly relate to BA Fiskars (which is H1 tilted), sales mix should improve in H2 in our view, supporting the company's performance.

For Q2, we expect sales to decrease 5.7% y/y, driven by the Fiskars BA and the US. We expect sales to decrease 10.3% in BA Fiskars and 0.5% in BA Vita. In terms of adj. EBIT margin, we expect a decrease of 3.1pp y/y in BA Fiskars (to 11.8%) and 0.9pp in BA Vita (to 0.3%). This results in the group margin decreasing 2.0pp to 4.8% on our estimates.

For full-year 2025, we expect sales to decrease 1.5% (BA Fiskars -3.6% and BA Vita +0.6%) while we believe the adj. EBIT margin will decrease 0.8pp to 8.9% (BA Fiskars -1.3pp to 12.8% and BA Vita -0.3pp to 7.6%).

Profit warning on 12 June

Fiskars Group announced on 12 June that it was lowering its guidance for 2025 as a result of a rapid decline in demand in the US in the second quarter of 2025. The new guidance for FY2025 is adj. EBIT in the range of EUR90-110m compared to its previous expectation for adj. EBIT to improve from the EUR111.4m in 2024.

According to the company, the indirect impacts from the US import tariffs on retailer demand and the retailers' inventory control have affected sales in the country more rapidly and negatively than the company had previously anticipated. The US represents approximately 30% of Fiskars Group's net sales and approximately 50% of Business Area Fiskars' net sales. The majority of the US sales is based on sourcing from Asia. According to the company, the indirect impacts have begun to materialise in Europe and in BA Vita as well.

Estimate changes

We lower our net sales estimates around 4% and adj. EBIT estimates 11.5-18.9% for 2025-27E.

Investment case

Fiskars Group manages several design-driven brands for both indoor and outdoor living. The company has two business areas, Vita and Fiskars, both roughly of equal size. Typical products in the Vita business area are premium and luxury tableware, such as glasses, plates, and cutlery, jewellery and interior decor. The offering in the Fiskars business area consists of e.g. scissors, shovels, axes, pruning shears, knives, cutting tools, and various products for cooking. The company's best-known brands are Fiskars, Georg Jensen, and Royal Copenhagen. Fiskars Group is present in over 100 countries and the company operates through some 450 own stores and online, while also distributing its products through various retailers and wholesale customers.

Fiskars Group's brands are strong, for example the Fiskars brand is the market leader in gardening and scissors in the US and Wedgwood is the leading brand in the luxury tableware segment in China. Approximately a third of Fiskars Group's sales comes from the luxury segment. In terms of sales, the US is the largest country for the company (some 30% of sales), followed by Finland (more than 10%), and other Nordic countries (Denmark some 9% and Sweden around 6%).

Over the past years, Fiskars Group has transformed significantly. For example, the brand portfolio has been streamlined, the company has entered more into the luxury segment, and the efficiency of the organisation has been improved. Today the company focus es on increasing the share of direct-to-consumer and its key markets, the US and China. In the longer term, the company targets mid-single digit growth (organic and FX neutral), driven mostly by the growth of the luxury market.

As consumer sentiment currently is on the weak side, demand for Fiskars Group's products remains somewhat subdued. In addition, as some 75% of sales are through retailers and wholesale customers, the higher-than-normal inventory situation of wholesale customers especially in the US continues to be a drag on demand. At the same time, the indirect impacts from US tariffs have had a larger impact than both the company and we had anticipated. In terms of demand, 2026 could potentially be better. Once volumes improve, the company should be able to leverage on its improved cost base, leaving clear upside potential in margins, we believe.

Not for US distribution

Commissioned Research - marketing material sponsored by Fiskars

So far, the significant actions in lowering costs and increasing efficiency have been overshadowed by the weak volumes.

We find that Fiskars Group has a high exposure (around 30% of sales) to the luxury market and the company should be able to deliver mid-single-digit growth in the longer term. This type of volume growth should yield strong operational leverage, especially when combined with the benefits of the simpler organisational structure that the company has been working on. Therefore, we find that Fiskars Group has room to improve margins clearly over the coming years. With ambitions to increase the share of luxury products further, the company's growth profile could improve further over time.

Valuation

We lower our fair value range to EUR14.5-17.5 (from EUR16-19), which corresponds to EV/EBIT of 13.1-15.0x on our 2026E estimates. We prefer to use our estimates for 2026E as we expect that 2025 will be burdened by weak consumer sentiment and indirect impacts from the US tariffs. We believe the operating environment could become more normal in 2026 compared to 2025.

Key risks

Fiskars Group is exposed to consumer sentiment both directly (direct-to-consumer sales some 25% of total sales) and indirectly (e.g. through retailers). Therefore, economic downtums or shifts in consumer behaviour can have a meaningful impact on demand for Fiskars Group's products. Similarly, changes in e.g. purchasing power or consumer confidence can influence demand. The faster-growing luxury brands and categories in particular are exposed to consumer sentiment.

Almost a third of Fiskars Group's sales comes from the US. Therefore, the inventory levels of large customers in the US can have a significant impact on demand for the company's products, especially in gardening and outdoor products. Also, any potential changes in tariffs on imports to the US can have an impact on demand for Fiskars Group products and/or its profitability.

Some 75% of Fiskars Group's sales come from retailers. The largest customers are, for example, Costco, Walmart, Target, Home Depot, and Amazon. Fiskars Group's pricing power can at times be limited towards these retailer juggernauts, which can impact margins especially if raw material or inflation in other costs is high.

With production being a significant cost item, changes in raw material price, salary inflation and logistics cost can have a sizeable impact on Fiskars Group's operations. Fiskars Group also utilises subcontracting, where the same cost items impact the price of sourcing. Fiskars Group may not be able to offset all increases in costs by price hikes, which can at times put pressure on margins.

Seasonal trends and weather conditions impact Fiskars Group's business. The second half of the year, particularly Q4, is important for the Vita business area due to the holiday season. For the Fiskars business area, the first half is vital for gardening tools, and weather significantly affects demand. A warm, early spring boosts sales, whereas a cold, rainy one does the opposite. Additionally, snow conditions affect winter tool sales. The back-to-school period in Q2 and Q3 is key for scissors sales.

Successful brands need to be relevant over time, requiring efforts in e.g. product design, R&D, and marketing. Failure in this may lead to decreasing brand value and thus sales. Turning losing brands around could be cumbersome and expensive. Staying relevant and improving brand recognition may require significant financial efforts.

Having its brands present in over 100 countries, Fiskars Group is exposed to changes in foreign exchange rates. The foreign exchange exposure is mainly translational.

As a manufacturer of e.g. garden tools and knives, Fiskars Group faces potential product liability risks if its products malfunction or break during use, leading to injury or damage. Such incidents could result in significant financial and reputational damages through liability claims and lawsuits.

Disclosures

This commissioned research report has been prepared by Equity Research, a division of Danske Bank A/S ('Danske Bank'). The author of this research report is Calle Loikkanen.

This commissioned research report should be considered marketing material, as it has been requested and paid for by Fiskars and has therefore not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, the report is still subject to prohibition on dealing ahead of the dissemination of the report.

Analyst certification

Each research analyst responsible for the content of this commissioned research report certifies that the views expressed in the research report accurately reflect the research analyst's personal view about the financial instruments and issuers covered by the research report.

Regulation

Danske Bank is authorised and regulated by the Danish Financial Services Authority (Finanstilsynet). Danske Bank is authorised by the Prudential Regulation Authority in the UK and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of our regulation by the Prudential Regulation Authority are available from us on request.

Danske Bank's commissioned research reports are prepared in accordance with the recommendations of Capital Market Denmark.

Conflicts of interest

Danske Bank has established procedures to prevent conflicts of interest and to ensure the provision of high-quality research based on research objectivity and independence from outside influences. These procedures are documented in Danske Bank's research policies. Employees within Danske Bank's Research Departments have been instructed that any request that might impair the objectivity of research and independence from outside influence of research shall be referred to Research Management and the Compliance Departments. Danske Bank's Research Departments are physically separated from other business areas within Danske Bank and surrounded by arrangements (Chinese Walls) to restrict the flows of sensitive information.

Research analysts are remunerated in part based on the overall profitability of Danske Bank, which includes investment banking revenues, but do not receive bonuses or other remuneration linked to specific corporate finance or debt capital transactions.

Danske Bank, its affiliates, subsidiaries and staff may perform services for or solicit business from Fiskars and may hold long or short positions in, or otherwise be interested in, the financial instruments mentioned in this research report. The Equity and Corporate Bonds analysts of Danske Bank and persons in other departments of Danske Bank with which the relevant analysts have close links are not permitted to invest in 1) financial instruments that are covered by the relevant Equity or Corporate Bonds analyst and 2) the research sector within the geographical area (the Nordics) to which the analyst is linked.

Danske Bank, its affiliates and subsidiaries are engaged in commercial banking, securities underwriting, dealing, trading, brokerage, investment management, investment banking, custody and other financial services activities, may be a lender to Fiskars and have whatever rights as are available to a creditor under applicable law and the applicable loan and credit agreements. At any time, Danske Bank, its affiliates and subsidiaries may have credit or other information regarding Fiskars that is not available to or may not be used by the personnel responsible for the preparation of this report, which might affect the analysis and opinions expressed in this research report.

Danske Bank is a market maker and a liquidity provider and may hold positions in the financial instruments of the issuer(s) mentioned in this research report.

No parts of this research report have been disclosed to Fiskars for factual check.

As an investment bank, Danske Bank, its affiliates and subsidiaries provide a variety of financial services, including investment banking services. It is possible that Danske Bank and/or its affiliates and/or its subsidiaries might seek to become engaged to provide such services to Fiskars in the next three months.

Financial models and/or methodology used in this research report

Investment views and opinions in this research report are formed on the basis of a combined selection of discounted cash flow analysis, industry knowledge, peer group analysis and company-specific and market technical elements (events affecting both the financial and operational profile of the company). Forecasting of company sales and earnings is based on segmented bottom-up models using subjective views of relevant future market developments. In addition, the expected macroeconomic environment is taken into account. The output is aggregated into models for group profit and loss, balance sheets and cash flow estimates – all taking into account the recent development in historical research reports.

More information about the valuation and/or methodology and the underlying assumptions is accessible via www.danskebank.com/equityresearch.

Risk warning

Major risks connected with investment views or opinions in this research report, including a sensitivity analysis of relevant assumptions, are stated throughout the text.

Expected updates

This research product will be updated on a semi-annual basis as a minimum.

Completion and first dissemination

The completion date and time in this research report mean the date and time when the author hands over the final version of the research report to Danske Bank's editing function for legal review and editing.

The date and time of first dissemination mean the date and estimated time of the first dissemination of this research report. The estimated time may deviate up to 15 minutes from the effective dissemination time due to technical limitations.

See the back page of this research report for the date and time of first dissemination.

Recommendation structure

This report does not have a target price or a buy/sell recommendation but it does include a valuation discussion and a suggested valuation range.

Validity time period

This communication as well as previous communications referred to below are valid until the earlier of (a) dissemination of a superseding communication by the author, or (b) significant changes in circumstances following its dissemination, including events relating to the market or the issuer, which can influence the price of the issuer or financial instrument.

General disclaimer

This commissioned research report has been prepared by Danske Bank A/S. It is provided for informational purposes only and should not be considered investment, legal or tax advice. It does not constitute or form part of, and shall under no circumstances be considered as, an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instruments (i.e. financial instruments mentioned herein or other financial instruments of any issuer mentioned herein and/or options, warrants, rights or other interests with respect to any such financial instruments) ('Relevant Financial Instruments').

This commissioned research report has been prepared independently and solely on the basis of publicly available information that Danske Bank A/S considers to be reliable but Danske Bank A/S has not independently verified the contents hereof. While reasonable care has been taken to ensure that its contents are not untrue or misleading, no representation or warranty, express or implied, is made as to and no reliance should be placed on the fairness, accuracy, completeness or reasonableness of the information, opinions and projections contained in this commissioned research report and Danske Bank A/S, its affiliates and subsidiaries accept no liability whatsoever for any direct or consequential loss, including without limitation any loss of profits, arising from reliance on this commissioned research report.

The opinions expressed herein are the opinions of the research analysts and reflect their opinion as of the date hereof. These opinions are subject to change and Danske Bank A/S does not undertake to notify any recipient of this research report of any such change nor of any other changes related to the information provided in this commissioned research report.

This commissioned research is not intended for, and may not be redistributed to, retail customers in the United Kingdom and may under no circumstances be distributed in the United States.

This research report is protected by copyright and is intended solely for the designated addressee. It may not be reproduced or distributed, in whole or in part, by any recipient for any purpose without Danske Bank A/S's prior written consent.

Disclaimer related to distribution in the United Kingdom

In the United Kingdom, this document is for distribution only to (I) persons who have professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the 'Order'); (II) high net worth entities falling within article 49(2)(a) to (d) of the Order; or (III) persons who are an elective professional client or a per se professional client under Chapter 3 of the FCA Conduct of Business Sourcebook (all such persons together being referred to as 'Relevant Persons'). In the United Kingdom, this document is directed only at Relevant Persons, and other persons should not act or rely on this document or any of its contents.

Disclaimer related to distribution in the European Economic Area

This document is being distributed to and is directed only at persons in member states of the European Economic Area ('EEA') who are 'Qualified Investors' within the meaning of Article 2(e) of the Prospectus Regulation (Regulation (EU) 2017/1129) ('Qualified Investors'). Any person in the EEA who receives this document will be deemed to have represented and agreed that it is a Qualified Investor. Any such recipient will also be deemed to have represented and agreed that it has not received this document on behalf of persons in the EEA other than Qualified Investors or persons in the UK and member states (where equivalent legislation exists) for whom the investor has authority to make decisions on a wholly discretionary basis. Danske Bank A/S will rely on the truth and accuracy of the foregoing representations and agreements. Any person in the EEA who is not a Qualified Investor should not act or rely on this document or any of its contents.
